

GREEN LOGISTICS & ESG COMMITMENT

Smart Logistics & Services Ltd is committed to responsible logistics practices that support environmental protection, social responsibility, and strong governance.

We recognize that sustainable logistics performance is essential to long-term business resilience and stakeholder trust. Our ESG commitments are embedded in operational planning, supplier selection, and performance management.

We commit to:

Environmental Responsibility

- Optimizing transport routes, cargo consolidation, and dwell times to reduce fuel consumption and emissions.
- Promoting efficient customs and port operations to minimize congestion and environmental impact.
- Encouraging the use of compliant, well-maintained vehicles and equipment.
- Reducing waste and paper usage through digitalization and process automation.
- Preventing pollution through spill control, waste management, and emergency response planning.

Social Responsibility

- Providing safe, fair, and respectful working conditions.
- Investing in training, local capacity development, and operational competence.
- Respecting human rights and promoting ethical conduct across our operations and supply chain.

Governance

- Operating with transparency, accountability, and compliance.
- Applying risk management and internal controls across business activities.
- Engaging suppliers and partners that align with our ESG expectations.

Smart Logistics & Services Ltd is committed to monitoring ESG performance and continuously improving our contribution to sustainable logistics development in Africa and beyond.
